lol. Hope on

hold on I mean. Needs testing.

I have downloaded everything. Very cool. Not too far to go.

Why don't we start with the code I do have and work from there?

Because, I mean, I'm pretty bad at this. You'd think I'd be like a wizard by now since this is the exact same project as the last three projects

But I'm not, because this course is awful garbage. I just want to get this column straightened out so I can turn it in and never darken your doorstep again.

Its just an example. It will take some time to debug yours, and besides everything is named differently. Some things might require more or less styling or deleted altogether. lol.

That is just, so much code being thrown at me. Can you explain some of that to me more slowly? I don't even have a .course or .media-container tag.

You do have so much stuff going on there. In an ideal situation, that particular section would use this css:

```
/* Courses */
```

```
#courses-section {  
  padding: 2rem 3.5rem;  
  background-color: rgb(245, 245, 245);  
}
```

```
.courses-row {  
  display: flex;  
}
```

```
.course {
  flex-basis: 33%;
  margin: 1rem;
  background-color: white;
}

.course .text-content {
  padding: 1rem 1rem 1.5rem 1rem;
}

.course h3,
.course h4 {
  padding-bottom: .5rem;
}

@media only screen and (max-width: 770px) {
  #courses-section {
    padding: 2rem 1rem;
    background-color: inherit;
  }

  .courses-row {
    flex-direction: column;
  }

  .course {
    margin: .25rem 0;
  }

  .course .text-content {
    background-color: rgb(216, 216, 216);
  }

  .course h3 {
    padding-bottom: 0;
  }

  .course .media-container,
  .course h4,
  .course p {
    display: none;
  }
}
```

I mean... there's a bunch. Which is probably a big part of the problem.

course_stack

course_line

stack

start_learning

main

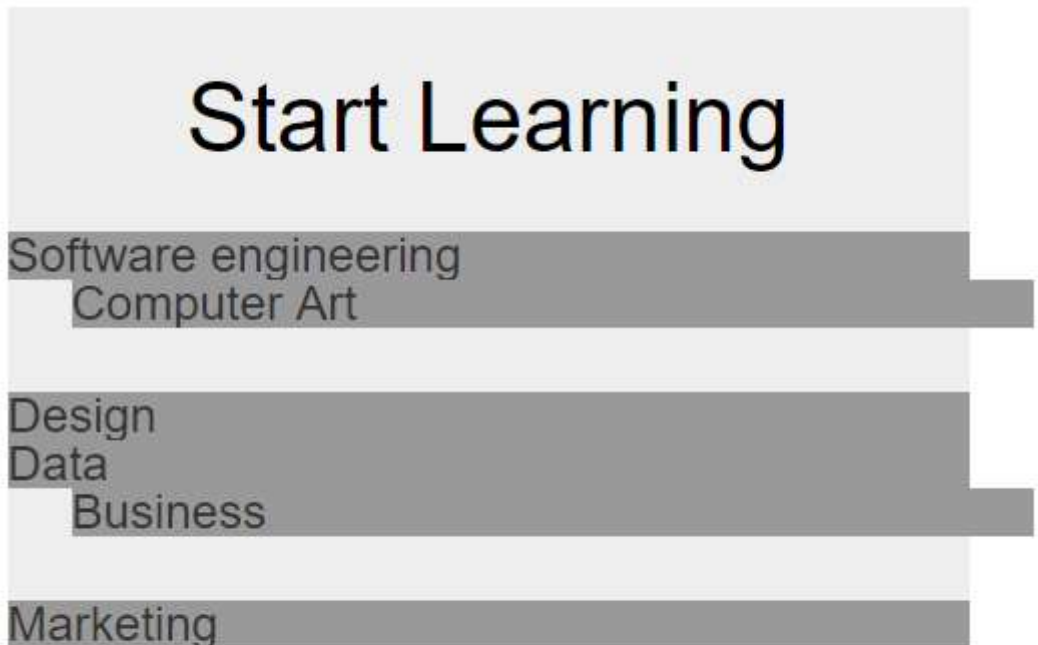

I did include a link to my code

I realize there are a lot of other issues, but that is the biggest/most obvious one and the one that strikes me as most unforgiveable.

Hi, I'm working on the Colmar Academy project. I'm on the last day of working on it and I want to clean up the most obvious errors before I submit it even though it doesn't look perfect. My code is at <https://github.com/mm314601/unit7>. You should be able to see what I'm going for with the rows and columns laid out the way that they are, and you should be able to see the wireframes for the project at <https://s3.amazonaws.com/codecademy-content/courses/freelance-1/capstone-2/colmar-academy-spec.png>.

My concern is the "Start Learning" section when you shrink the window down to 480px wide.

The names of the six courses aren't lined up in a nice neat column like I would like for them to be.
